DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Rejection of claims 9, 20-22, 28 and 30-32 under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention is **withdrawn** in view of the Examiner's Amendment to claim 20 and Applicants' arguments.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Rejection of claims 20-22 under 35 U.S.C. 102(b) as being anticipated by each of Kato, et al. and Mizumo, et al. is **withdrawn** in view of the Examiner's Amendment to claim 20 and Applicants' arguments.

Claims are Rejoined

3. Claims 1, 4-6, 20-22, and 27-32 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(b), claims 9, 11, 13, 16-18, and 23-26, directed to the process of making or using the allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104. Claims 7-8 and

14-15, directed to the invention(s) of hosts organisms and HCV-derived polymers do not require all the limitations of an allowable product claim, and have NOT been rejoined.

Because a claimed invention previously withdrawn from consideration under 37 CFR 1.142 has been rejoined, **the restriction requirement amongst groups I, III, and IV as set forth in the Office action mailed on 12/18/2006 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kathleen D. Rigaut, Ph.D., J.D. on March 10, 2008.

The application has been amended as follows:

20. A hepatitis C virus (HCV) replicating cell line, wherein said cell line is a human non-hepatic cell line,
wherein said cell line comprises genomic HCV RNA, and
wherein said genomic HCV RNA consists of HCV RNA obtainable from a second HCV replicating human cell line.

Claims 7-8 and 14-15 are **cancelled**.

5. The following is an examiner's statement of reasons for allowance: The inventions of the instant Application are novel and non-obvious for several reasons. Prior to the invention of the instant Application, replication of HCV in cell-lines was relatively poor as compared to other similar viruses such as dengue or yellow fever viruses. Also, most cell-line models of HCV replication were obtained by transfection of cDNA derived from wild-type HCV but as mentioned previously resulted in unsatisfactory replication kinetics. Although the inventors of the huh-7 infected cell line suggested in their PCT Application (Houghton et al., US 5,679,342) that there were a variety of cell-lines potentially capable of propagating HCV such as human B cell lines and murine hepatic cell lines and further that such cell-lines may be infected by methods such as PEG fusion of HCV-infected ex-planted cells obtained from sources such as biopsy, the result would be a hybrid cell. In the case of fusing non-human cell-lines such as the murine hepatic cell-lines with human or chimpanzee explanted primary cells, the resultant cell-line would be hybrid murine/primate cell-line. One the

other hand, fusing human non-hepatic cell-lines with primary explanted cells one would obtain hybrid hepatic/non-hepatic cell-lines. Either of these cell-lines would most likely lack the robustness of the invented cell-lines of the instant Application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowable Subject Matter

6. Claims 1, 4-6, 9, 11, 13, 16-18, 20-32 are allowed.
